

Objective

Seeking a challenging, positive environment that encourages continuous learning and creativity, providing exposure to new technologies and simulates personal and professional growth.

Summary

Having **4.5** years of experience in Manual and automation testing including Provar testing (manual and automation).

- ❖ Worked on web automation using **Selenium** and **Provar** With Java ,TestNG
- ❖ Expertise in create,update,dubug test case and update the existing automation scripts using **Selenium** and **ProvarAutomation** tool.
- ❖ Implemented Page Objects, Module based frameworks using **Selenium WebDriver, JAVA, TestNG**
- ❖ Creating automated test cases using modern frameworks for integration with our **CI/CD pipeline**
- ❖ Maintained the **Selenium & JAVA** automation code and resources in source controls like TFS/Git over the time for improvements and new features.
- ❖ Having experience in API tools like **Postman**.
- ❖ Good exposure to **Agile Methodology &** Software Development Life Cycle (**SDLC**).
- ❖ Profound knowledge in **Test Plan** and **Test Metrics and Defect Related Metrics**.
- ❖ Expertise in **Defect Life Cycle / Bug Life Cycle**.
- ❖ Experience in **Functional Testing, end-to-end application testing**.
- ❖ Knowledge in **Adhoc Testing, Acceptance Testing, and performance testing**.
- ❖ Good experience in design and execution of **Test Cases** and **Scenarios**.

Skills

**Testing Types** : Manual Testing,API Testing,Provar, Automation Testing,Database Testing,Mobile  
**Automation Testing tools** : Selenium,Provar  
**Web Tech** : HTML5,CSS3,JavaScript,XML,JSON  
**Database** : MYSQL  
**Windows App Automation Tools** : Sikuli,AutoIT  
**Testing Framework** : TestNG, Data Driven Testing by using Apache POI, Hybrid framework, POM.  
**Languages** : JavaScript,Java,React Library  
**Browsers** : Chrome,Firefox,Edge,Opera,Safari  
**Bug Tracking Tools** : JIRA,Bug Zilla ,Dev Track  
**Development Tools** : Git , NPM , Yarn , Node  
**Test Management Tools** : Quality Center, Zephyr

Work Experience

Software Developer and QA Tester

- ❖ Working as **Quality Analyst** at **Provar India** from 25-May-2022 to 30-Nov-2023.
- ❖ Worked as **Software Engineer** and **Software Test Engineer** at Quokka Labs from 15-Sep-2021 to 31-March-2022.
- ❖ Worked as **QA Tester** Essence Studios Gurgaon from 11-Feb-2019 to 10-Aug-2021.

Provar India -

1. Provar

:

Testing Automation For Salesforce Application
- Role

:

Quality Analyst

Description:

We used to test different releases of Salesforce through Provar. In which we maintain our automation pack and create and update different automation scripts. Designed and developed Provar test cases to cover end-to-end business scenarios, including complex workflows, custom configurations, and third-party integrations.

Roles & Responsibilities:

- ❖ Enhancing the scripts and running the regression test suite.
- ❖ Designed and executed Provar test suites, ensuring thorough coverage of Salesforce functionalities, including complex workflows and integrations.
- ❖ Conducted regression testing to validate the impact of changes and updates on existing Salesforce implementations.
- ❖ Conducted Smoke Testing on each release cycle.
- ❖ Worked closely with cross-functional teams to troubleshoot and resolve Provar test script issues, ensuring the stability and reliability of automated tests.
- ❖ Provided valuable insights and recommendations for improving test coverage and the efficiency of Provar testing processes.
- ❖ Maintenance of Automation Scripts for existing Application.

2. Project

:

EDW (Enterprise Wide Data Warehousing)

- Duration

:

Dec 2021- March 2022
- Team size

:

6
- Role

:

Software Test Engineer
- Client

:

Oriental Bank of Commerce

Description:

Oriental Bank of Commerce is implementing Enterprise-Wide Data Warehouse (EDW) project with following modules: EFRMS-Enterprise Fraud risk management solution,RSA Authentication, Internet Banking, Mobile Banking, Reports: Branch Monitoring And Revenue leakage.

Roles & Responsibilities:

- ❖ Testing includes Automation and Functional testing of the various modules of application Testing includes validation of database for various records present in the various files loaded in the database.
- ❖ Handled modules in the project single handedly and made the application stable by maximum issues at early stages of testing.
- ❖ High level Smoke, Functional, GUI, Re Testing.
- ❖ Monitoring the CI/CD pipeline and fixing/escalating as appropriate & Regression testing.
- ❖ Preparing Test cases, reviewing the Test cases and executing those Test cases.
- ❖ Communicating with team members across the locations.
- ❖ Conducting API testing for each module.

Software Developer and Tester-

Quokka Labs -

1. Project : Australia Domestic Payments
- Duration : May 2019- Nov 2019
- Team size : 5
- Role : Software Test Engineer
- Client : INFIN Bank

Description:

INFIN Bank is a Prominent Bank Operating in Australia, it has identified several bank and country specific gaps in its Current Operations, so as a part of Australia Domestic Payments project, Profinch has agreed to develop and deliver bank specific gaps to INFIN Bank.

Roles & Responsibilities:

- ❖ Framing and executing the test cases based upon the Functional Business document.
- ❖ Implemented automation using Selenium **WebDriver, JAVA, and Selenium Grid Maven.**
- ❖ Initiating the Modules by taking all the responsibilities in all the directions.
